

COMPUTER SAFETY DEVICE AND METHODS FOR INCREASING THE SAFETY OF A PERSON CARRYING THE DEVICE

5

ABSTRACT

Methods and systems for increasing the safety of a person carrying a portable computer are described. In one embodiment, the safety device comprises a portable computer having a housing and a power source supported by the housing. At least one
10 light-emitting device is connected to the power source and is configured to emit light responsive to the computer being carried. In another embodiment, the portable computer has a housing and at least one light reflecting safety structure attached to the housing.
